

Inspection Systems, Inc. Enhances its *Compliance-Pro™ Report Bar Code* Inspection System

Minneapolis –

Inspection Systems, Inc. has significantly enhanced their On-line Bar Code Inspection *Compliance-Pro™ Report* system.

New features include:

- Faster running speeds
- Management of more complex sequences / numbers
- Increased accuracy of label description to the press

The Compliance-Pro™ Report product can be installed on any rewind system, printing press, production line or print/apply machine, and offers the following capabilities:

- Inspects to ISO 15416 / ANSI X3.182 standards
- ISO 15426 compliant
- Can archive data for reports or quality system logs
- Interfaces and shares data with existing software systems
- Speeds up to 1000 fpm.
- Programmable output trigger events

Expandable to multiple scan heads, and with offline-viewable data, this system provides a wealth of tools for bar code print and data management.

About I.S.I.

Inspection Systems, Inc. (I.S.I.), a custom engineering company, specializes in the design and manufacture of high speed bar code inspection equipment. Since incorporation in 1990, I.S.I. has introduced numerous innovative bar code inspection systems within its' Compliance Pro™ line. There are systems to meet demands from simple data match to full ISO15416/ANSI x.3 inspection with integration with digital printing, to complex sequence management programs.
